Ms. Fink,

Thank you for your response.

As previously communicated prior to this email, Price Landscaping Services LLC made the decision to discontinue snow removal services for Sussex Square. The Board's decision to reduce payment for completed services confirms that this was the appropriate business decision for our company.

We stand behind the work performed, the resources deployed, and the professionalism of our team during that storm event. Snow and ice management requires significant labor coordination, equipment availability, and operational risk, and we can only partner with organizations that recognize and respect the execution realities of these services.

While we acknowledge the Association considers the matter closed, for our records we do not agree that the reduced payment reflects the full value of services performed.

Price Landscaping Services will continue to fulfill any remaining non-snow contractual obligations currently in place. However, we will not be providing any future snow and ice management services.

We wish Sussex Square success in its future contractor relationships.

Sincerely,

Coty Price

Price Landscaping Services LLC
